WPA-BTN-1C

## Wirelessly Share 4K Video, No Software Required

The ALOGIC 4K Wireless Presenter allows meeting participants to show video from their computer – no cables required. The problem with most wireless presenters is the clunky software required to connect to them. This wireless presenter replaces the need to download software with a convenient button. Simply connect the button to an available USB port, press the button, and presto – your computer is shown on the display wirelessly.

Multiple wireless buttons can be used with the same wireless presenter to allow multiple people to connect to the display and choose who is presenting at any time. Mobile devices can connect using the button, or by casting directly to the device.

## Touch Screens Made Wireless

### Works with Touch Interfaces

Interface devices such as touchscreens can be connected to the base station and are passed through to the computer via the connection button. The base station can also connect the presenter's laptop to a gigabit network connection; providing a simple way of connecting presenters' computers from outside the organisation to a guest network.

## Just Plug and Press

### Plug and Play – No Drivers Required

Having to install drivers and software is a barrier to use for meeting room technology. The easy to use button allows users to connect to a meeting room display with no clunky set up required.

## Wireless Freedom

### Break Free of Being Tethered by Cables

With no wires required, users can present from anywhere in a meeting room. Gone are the days of only being able to connect a laptop at one end of the meeting room table – now anyone can share their screen, no matter where they are in the room.

- 1 Wireless Connection Button
- 2 Wireless Presenter Base Station

## Input

Users can send video from laptops and mobile devices to the base station using the USB-C connection button or by casting using Airplay (Apple), Miracast (Android) or DLNA.

Source device USB-C ports must support video output (DisplayPort Alternate Mode) to work with the button device.

## Presenter Ports

- 1x HDMI, up to 4K 30Hz
- 2x USB-A , Support Touchscreen/Mouse Interfaces and Media Storage Devices
- Gigabit Ethernet
- 3.5mm Audio Out

## Power

12V 1A Power Adapter (Supplied)

## Dimensions

138 x 108 x 30mm (L x W x H)

## Weight

330g (presenter base station)
